

Parsa Heidari

Tehran, Iran | heidarip680@gmail.com | 09101162436 GitHub:
github.com/ParsaGg | LinkedIn: [Your LinkedIn URL][cite: 2]

PROFESSIONAL SUMMARY Driven Software Engineering Student with a strong foundation in Python[cite: 1, 2] and a deep passion for artificial intelligence and machine learning. Possesses hands-on academic experience in prompt engineering and foundational knowledge of deep learning and Natural Language Processing (NLP). Highly adaptable and eager to translate theoretical coursework into practical solutions within a collaborative R&D environment. Demonstrated commitment to continuous learning through specialized AI certifications, seeking to leverage analytical skills and technical enthusiasm to support innovative AI initiatives as an intern.

SKILLS

- **Programming Languages:** Python (Intermediate)[cite: 1, 2], HTML & CSS (Familiarity)[cite: 2]
- **AI & ML Technologies:** Prompt Engineering (Intermediate)[cite: 2], Large Language Models (LLMs)[cite: 2], Deep Learning Basics[cite: 2]
- **NLP Frameworks:** Natural Language Processing (NLP) Concepts[cite: 2], API Integration[cite: 2], Transformer Fundamentals[cite: 2]
- **Developer Tools:** Git, GitHub[cite: 2], VS Code[cite: 2], Prompt Evaluation
- **Soft Skills:** Analytical Problem Solving, Continuous Technical Learning, Cross-functional Collaboration

EDUCATION

Continuous Associate Degree (Kardani Peyvasteh) in Professional Software Engineering

Islamic Azad University, Qalehak Branch | Tehran, Iran[cite: 1, 2]

Expected Graduation: [Year]

Technical Diploma in Computer Network and Software

Shahid Doctor Technical High School | Tehran, Iran[cite: 1, 2]

Graduated: 2024[cite: 2]

TECHNICAL PROJECTS

Smart Text Summarizer | Python & LLM API Integration

- Developed a Python-based application utilizing the Anthropic Claude and OpenAI APIs to generate concise, accurate summaries of long-form documents.[cite: 2]
- Applied intermediate prompt engineering techniques to optimize the LLM's output for specific tones, constraints, and formatting requirements.[cite: 2]
- Evaluated model outputs using baseline NLP quality metrics to ensure reliability and consistency in generated responses.[cite: 2]

Persian Sentiment Analyzer | NLP & Deep Learning Fundamentals

- Implemented a foundational text classification pipeline utilizing pre-trained Hugging Face transformers (ParsBERT) to analyze sentiment in Persian text.[cite: 2]
- Preprocessed and tokenized raw text datasets utilizing Pandas, demonstrating an understanding of essential data preparation for machine learning.[cite: 2]
- Documented model performance and evaluation metrics in a structured academic report, showcasing attention to detail and research methodologies.[cite: 2]

EXPERIENCE

Network & Communications Intern[cite: 2]

Mobinnet Telecommunications | Tehran, Iran[cite: 2] | *Summer 2024*[cite: 2]

- Gained practical exposure to enterprise-level network infrastructure and IT systems in a fast-paced environment.[cite: 2]
- Collaborated directly with engineering teams, ensuring accurate documentation and applying foundational protocols to technical tasks.[cite: 2]

Technical Intern[cite: 2]

Shahed University | Tehran, Iran[cite: 2] | *Summer 2023*[cite: 2]

- Supported hardware and software configuration tasks, troubleshooting basic network connectivity issues alongside senior engineering staff.[cite: 2]

CERTIFICATIONS

- **AI Technologies (Level 1 & 2): TechnoSharif Innovation Center[cite: 2]**
- **LLM & Generative AI Business Design: TechnoSharif Innovation Center (In Progress)[cite: 2]**
